Preventive medicine: loving pet care

How The Puppyshot™, and your veterinarian, can help make your dog healthier . . . everyone happier.

Like a loving hug, your veterinarian's program of preventive medicine is another way to show your dog how much you really care. In fact, *your veterinarian should be the source of everything you need to keep your dog healthy and happy,* from puppyhood on.

For example, your puppy's immunization series and annual booster. Now it can include The Puppyshot™—the most complete protection available in one injection—against the major viral diseases that threaten your dog's health. Including: distemper, hepatitis and parainfluenza; plus viral diarrhea, caused by parvovirus and coronavirus.

So, talk with your veterinarian soon to make sure that your dog is on the total health program that's right for its needs. A program of preventive medicine that *means* loving care.

The Puppyshot™

(Duramune® $DA_2PP+CvK$)

Distemper, Hepatitis, Parainfluenza, Parvovirus and Coronavirus Vaccine

As advertised in FAMILY CIRCLE
and LADIES' HOME JOURNAL
telling the advantages of pet
preventive medicine to more than
40,000,000 readers.

The Solution.

Waste disposal is becoming a growing problem to the health care industry. Many states are now requiring on-site disposal at many health care institutions. If on-site waste disposal is currently or will soon be a requirement for your operation, Shenandoah has the solution.

The Shenandoah line of incinerators are efficient and can handle your on-site disposal needs safely, thoroughly, and economically. Shenandoah's sixty plus years of quality manufacturing stand behind every incinerator we build.

Shenandoah professional incinerators are made to exacting standards and are refractory lined for heat retention and durability. The burners are temperature controlled for a clean, efficient burn. All models are tested and meet air quality standards for emissions.

Installation of a Shenandoah incinerator is not a major operation either. Often, just a concrete slab, shelter and a minimum of connections is all that is required.

For more information about the Shenandoah solution, call toll free 1-800/336-4052. In Virginia call 703/434-3838, TLX: 710-839-1395, FAX: 703/434-3068.

FOREWARD

The AVMA Directory lists AVMA members in the United States, Canada, and other countries and those nonmember veterinarians for whom data is available in AVMA records and who ask to be listed. The listings and statistics contained in the AVMA Directory do not reflect the total veterinary population in the United States or any other country. They include only the AVMA members and those nonmembers who responded to the verification survey by October 1, 1988.

We have attempted to assure the accuracy of our record data for every member during the past year. We assume that the listings are correct for those who did not reply. Anyone who discovers an error in his or her listing is asked to please advise us so that we can correct our records and future listings.

The AVMA Executive Board has approved the annual publication and distribution of the AVMA Directory to each member of the Association without additional charge.

The 1989 AVMA Directory consists of three sections:

The Alphabetical Section (pages 3 to 144) lists in alphabetic sequence the name, city, state, province, or country of each veterinarian and the member status code.

The Geographic Section (pages 147 to 455) lists, by state and town (or country), the veterinarian's name, spouse's name, full address, telephone number, school and year of graduation, professional activity, type of employment, and employment function.

The Reference Section (pages 459 to 722) contains information on AVMA organization and history, names and addresses of other veterinary and related associations, federal and state government agencies, and veterinary colleges.

"Reach the Best Minds in Small Animal Nutrition"

When you need answers on any aspect of nutrition for the management and prevention of disease, call **1-800-255-0449.** It connects you with the best minds in small animal nutrition. You'll be talking to Dietary Management Clinicians who have actual veterinary practice experience and advanced degrees in Pharmacology, Pathology, Clinical Pathology and Parasitology.

Think of our toll-free number as part of your practice. It is one more link in Hill's close partnership with the veterinary profession. A partnership that began forty years ago when Dr. Mark Morris invented the first Hill's diet. Working with you and learning from your experience has made Hill's a company with a single focus: nutrition with a purpose. Products you can trust and recommend.

A Partnership of Trust™

Hill's
PET PRODUCTS
DIVISION OF COLGATE-PALMOLIVE COMPANY

ROMPUN®
Xylazine
Exclusive from Haver Research

Rompun®. Because there is
Xylazine no substitute for trust.

Veterinarians everywhere trust the quality of Rompun. It's been used worldwide with confidence and time-tested reliability.

~ 20 years of experiential data.
~ Proven performance millions of times.
~ Tests indicate a safety factor in small animals up to 10 times recommended dosage.
~ Also available in 100 mg/ml for use in horses.

See your distributor or Haver sales representative for the quality and dependability of Rompun brand xylazine.

ROMPUN® xylazine 20 mg/ml Injectable should be used in dogs and cats when it is desirable to produce a state of sedation accompanied by a shorter period of analgesia.

PRECAUTIONS: ROMPUN is not recommended for use in pregnant dogs or cats. Careful consideration should be given before administering to dogs or cats with significantly depressed respiration, severe pathologic heart disease, advanced liver or kidney disease, severe endotoxic or traumatic shock and stress conditions such as extreme heat, cold or fatigue. Analgesic effect is variable. In spite of sedation, the practitioner and handlers should proceed with caution since defense reactions may not be diminished. Do not use ROMPUN in conjunction with tranquilizers. Use with caution with central nervous system depressants. Products known to produce respiratory depression or apnea should be given at a reduced dosage and administered slowly.

WARNING: This drug is for use in dogs and cats only.

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian.

SIDE EFFECTS: Emesis in dogs and cats soon after administration of ROMPUN, but before clinical sedation is evident.

Occasional slight muscle tremors, bradycardia with A-V heart block and a reduced respiratory rate.

Movement in response to sharp auditory stimuli. Increased urination in cats.

Consult package insert for complete details.

Purina
PRO PLAN
brand Pet Food

Total Nutrition. Top Performance. According To Plan.

Total nutrition, top performance. Plan on it with Pro Plan. The only dog food line made with dressed chicken as a primary ingredient. Chicken, along with other select ingredients, supplies the nutrients your dog needs for strong bones, teeth and muscles as well as healthy skin and coat.

When you feed your dog Pro Plan, he benefits from a lifetime nutrition plan that is backed by 60 years of Purina research. And since there's a Pro Plan for each stage of your dog's life, he can get all the nutrition he needs to look and feel his best at any age or activity level.

Pro Plan. Available only at finer pet and feed stores and veterinarians. For a location near you, call toll free

4604

has such strong legs to stand on

Strongid® T and ivermectin as rotational partners make a deworming program that can benefit your clients, their horses and you.

UNIQUE CHEMISTRY:

Strongid T (pyrantel pamoate) and ivermectin each stand in a chemical class of their own. Unlike the commonly used benzimidazoles and organophosphates, no resistance problems have ever been associated with Strongid—making it an ideal rotation partner.

EFFICACY:

Strongid T delivers unsurpassed control of the worms most common to horses—large and small strongyles, large roundworms and pinworms.

SAFETY:

Strongid T is so safe it's been used by professionals with confidence for years. You can even treat pregnant mares, sucklings, weanlings and horses at stud—without fasting.

YOUR PROFESSIONAL CARE:

Recommending a six-week rotational deworming program with Strongid T lets you personally treat each animal. Tubing gives you more opportunities to deworm and monitor the overall health of each horse, which adds up to better service for your clients.

So make Strongid a part of your rotational program. For added flexibility in your practice, it's available in quarts, plus dispensable 60-ml bottles and paste.

Strongid T
Strongid Paste
Equine Anthelmintic

pfizer

BRIEF SUMMARY:
STRONGID® T (pyrantel pamoate). Equine anthelmintic suspension.

DESCRIPTION: Strongid T is a suspension of pyrantel pamoate. Each ml contains 50 mg of pyrantel base as pyrantel pamoate. Pyrantel pamoate belongs to the chemical class tetrahydropyrimidines.

INDICATIONS: For the removal and control of mature infections of large strongyles *(Strongylus vulgaris, S. edentatus, S. equinus)*; small strongyles *(Trichonema* spp., *Tridontophorus* spp.*)*; pinworms *(Oxyuris equi)*; and large roundworms *(Parascaris equorum)* in horses and ponies.

DOSAGE AND TREATMENT: Administer 3 mg pyrantel base per pound of body weight (6 ml Strongid T per 100 lb body weight), by stomach tube, oral dose syringe or in the feed. Foals (2–8 months of age) should be dosed every 4 weeks. Horses over 8 months of age should be routinely dosed every 6 weeks.

SAFETY: No adverse drug response was observed when dose rates up to 60 ml pyrantel base per pound of body weight were administered by stomach tube. The reproductive performance of pregnant mares and stud horses dosed with Strongid T has not been affected.

WARNING: Not for horses or ponies intended for food. Keep out of reach of children.

CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian. It is recommended that severely debilitated animals not be treated with this preparation.

RECOMMENDED STORAGE: Store below 86°F (30°C).

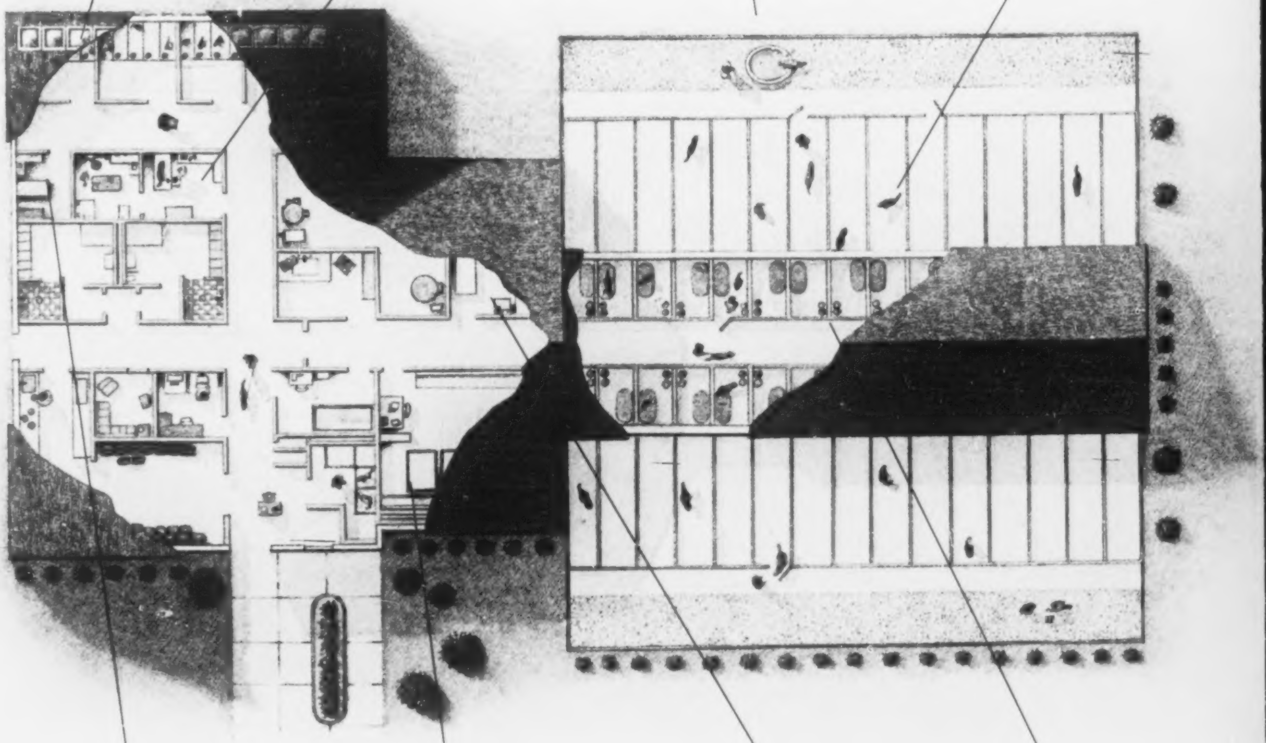
How the lab on the left



Photoperiod Control: To regulate the light during certain tests, for greater environmental control and accuracy of results.

Veterinary Exam Room: To assess physical changes.

Exercise Area: Extensive grounds to promote human socialization, and to stimulate a home environment.

Dog Pens: Larger than industry standards at 156 square feet to encourage exercise and improve socialization.

Whelping Room: To observe the effects of proper nutrition on newborn puppies.

Dog Metabolism Room: For protein and energy retention studies.

Grooming Room: To groom animals on a regular basis, for socialization and to evaluate skin and coat condition.

Deionized Water System: To provide animals with pure drinking water for greater test accuracy.

The lab on the left is the Paul F. Iams Technical Center. It represents 40 years of dedication to the very best in canine and feline nutrition.

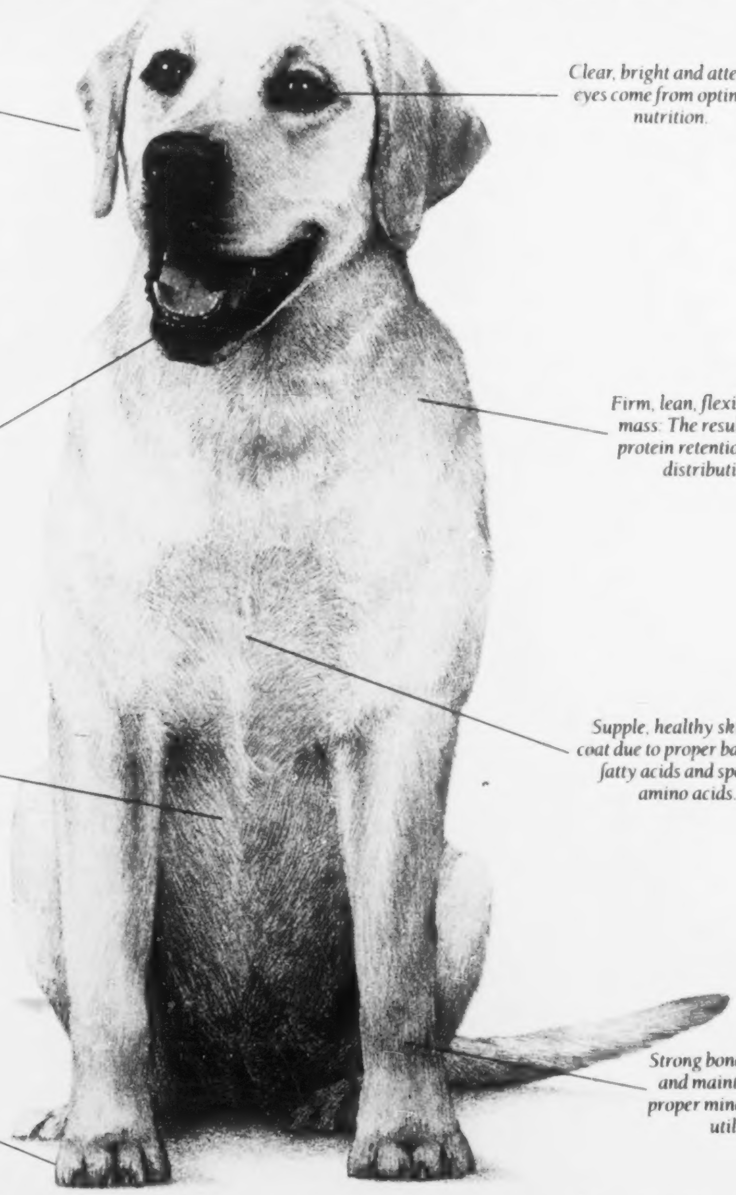
The Lab on the right represents the millions of dogs and cats that benefit directly from such a lab.

This Technical Center is quite possibly the most advanced companion animal research facility of its kind. It is a facility driven by the belief that the more accurate the research, the better we can develop products which provide for the nutritional needs of dogs and cats.

Therefore, for the sake of accuracy, we study animals in an environment that is as close to real life as possible. An environment that includes extensive human and animal socialization.

To strive for the highest quality products, Iams conducts metabolism studies evaluating both stool and urine. A practice that ensures veterinarians of the most nutritious food products for their patients.

affects the Lab on the right.



Healthy energy level through balanced nutrition.

Clear, bright and attentive eyes come from optimum nutrition.

Clean, white teeth and healthy gums caused by the cleaning effects of dry food.

Firm, lean, flexible muscle mass: The result of ideal protein retention and fat distribution.

A healthy digestive tract and a small, firm stool due to greater digestibility.

Supple, healthy skin and coat due to proper balance of fatty acids and specific amino acids.

Smooth, resilient nose and footpad leather from balanced fatty acids and amino acids.

Strong bone structure built and maintained through proper mineral and protein utilization.

What's more, Iams research goes well beyond the four walls of the Technical Center. We channel funds toward university studies of companion animal nutrition, dermatology, allergies, geriatrics and kidney disorders–all to enhance animal health and well-being.

What all this research and effort adds up to is this: at the lab on the left, we look at our products as not just food for pets, but food for thought. And that's what makes a healthy difference in the Lab on the right.

It's a difference your clients can see and their pets can feel. For more information, or for a set of free technical brochures, call 1-800-525-IAMS.

IAMS

As dedicated to animal well-being as you are.

©1988 The Iams Company.

NOW DEWORM THEM ANYTIME WITH NEMATEL.™ AND DON'T WASTE A DROP.

Recommend and dispense Nematel bolus. Now approved for lactating dairy cattle, it's the anytime dewormer that works on everybody's schedule… with no milk discard.

That's a claim that no other paste, injectable or bolus dewormer can make.

For heifers and cows—at freshening, during lactation or when dry—Nematel (bolus form of morantel tartrate) is highly effective against the most harmful gastrointestinal worms. And its total treatment flexibility allows your clients to easily fit parasite control programs into their current management practices. That means more freedom and flexibility for your practice, too!

Write or call Pfizer for more information about Nematel's role in your total herd health programs.

Because now, you can deworm dairy cattle anytime. Without leaving a mark in wasted milk.
